### MARKET SUMMARY

The number of floating houses for sale has increased from 23 earlier this year to 41. The pace of new buyer inquiries and showings remains fairly high.

The number of slips available which can accommodate floating houses is low and is dropping as slips fill up. We estimate the total number of both rented and owned slips available for floating houses, including both what is in the RMLS and also rental slips currently available, at approximately 15 across the entire river system.

**Graham Marden, GRI and John Wesley McPherson, Jr., CFA** joined forces in December, 2015 at Premiere Property Group, LLC, the largest real estate brokerage in the Pacific Northwest. We look forward to helping you with your real estate needs on land or water. Graham has helped clients buy and sell more floating homes than any other broker in Oregon. John has worked in finance and real estate for the past 20+ years, including in residential real estate, commercial real estate, commercial real estate finance, and energy commodities trading and transaction structuring. John also lives in a floating house.

***Call or write anytime about any questions or thoughts you have regarding real estate.***
